Device Set-Up

1. Connect your phone to the OBi’s PHONE port

2. Connect one end of the Ethernet cable to the OBi’s INTERNET port and Connect the other end of the Ethernet cable to your router.

3. Connect the power adapter to the OBi.

4. Pick-up the phone connected to the OBi’s phone port and dial **9 222-222-222 to perform the OBi the echo test. When you can hear your own voice echoed back at you, then the OBi is set-up correctly. If you cannot hear your voice echoed back at you check that the connections are correct and your Internet service is working.
